

Building Management Building Trades

What You'll Learn

BUILDING MANAGEMENT: Students will attain the skills necessary to function in the Property Management and Facilities Management fields. These skills include:

- Planning, scheduling, and estimating renovation properties
- Troubleshooting, repair of mechanical systems
- Supervisory, business, and management practices
- Overview of all building trade areas

BUILDING TRADES: Students will develop basic hands-on skills for employment in the fields of Building Construction and Building Restoration. These skills include:

- Basic estimating
- Blueprint reading and project management skills

What You'll Need

- A basic understanding of the trades
- A reasonable level of math to apply to the Building Trades field
- Ability to visualize concepts from drawings
- It is helpful if students have an interest in historic restoration

What You Can Expect to Earn

\$25,000 - \$41,000 Salaries vary based on student's abilities and experience.
